National Experience & Local, Responsive Service

Mead & Hunt is your choice for aviation consultant services, because we bring the best of both worlds: national experience and local, responsive service.

We have provided aviation consulting for 70 years to clients coast-to-coast. This experience means our team brings the industry's top innovations, best practices and solutions to Bismarck Airport's challenges.

We're here for you. Our Bismarck office is just a few miles from the airport, meaning we can meet face-to-face within minutes. We are also supported by four local subconsultants and staff from our Fargo office. This direct access translates to responsive service and local familiarity.

Our full-service capabilities provides you with a one-stop shop. More than half of our company is dedicated to aviation services, giving you deep bench strength and access to traditional disciplines, such as engineering, planning and architecture, as well as niche services, including air service, wildlife hazard management and financial planning.

Our full-service aviation capabilities, local presence and in-depth familiarity with your airport translates to a team that knows your goals and can help you meet them. **We are ready to help you plan, design and construct your future.**

Your Team

JON SCRAPER, PE, PROJECT MANAGER

Jon has 17 years of experience providing engineering services to general aviation and commercial service airports across the Dakotas and Minnesota. His experience ranges from project formulation, environmental documentation, through design, construction and close-out. Jon has managed complex airfield projects, including runway improvements similar to Bismarck across North Dakota. As the project manager, Jon will serve as the main point-of-contact and will be involved in each aspect of providing the highest level of service through a personal approach. 

PAUL STREGÉ, PE, CM, PROJECT PHASING & PLANNING LEAD

Paul has 17 years of aviation planning and design experience, providing project management and technical analysis. His responsibilities have included airport master plans and layout plans, benefit cost analysis, construction plans and technical specifications, airfield and landside design, and environmental studies. As your project phasing and planning lead, he will apply his diverse aviation experience to your projects, blending proven best practices with innovative solutions for a customized approach. 

JEN BOEHM, PE, LEED AP, ENGINEERING DESIGN, PHASING & PROJECT COORDINATION

Located in Bismarck, Jen is your local resource and will support nearly every aspect of your engineering projects. She is available if you need a quick question answered or a status update on your ongoing projects. Jen has seven years of experience at large-hub airports, which informs her phasing and coordination tactics. As a project manager and lead engineer, Jen has led a variety of airside improvements from design through bidding and construction. Her most recent experience includes completing the pavement condition index report for every North Dakota airport. 

JEFF KLEIN, PE, ENGINEERING

Jeff is an aviation project manager with more than 16 years of experience. His abilities include development of plans and specifications, bidding, contract administration, cost estimates, agency coordination, grant administration and construction observation. Jeff's experience leading new, reconstruction and rehabilitation pavement projects at Upper Midwest airports similar to Bismarck means he is skilled at designing complex, multi-phased improvements that balance the needs of an airport's users with its operating, scheduling and funding challenges. 

ANDY PLATZ, PE, FAA FUNDING COORDINATOR

As president of Mead & Hunt and the former aviation group leader, Andy has extensive knowledge of project funding sources, particularly FAA funding criteria and requirements in multiple FAA regions. He has 25 years of nationwide experience in management, planning, design and construction of civilian and military airfield projects. Andy can work with you to plan strategies to accomplish initiatives, develop political and FAA support for projects, creating financial plans and assisting with identifying and pursuing funding sources.
